

International Oil and Gas Contracts in Jakarta

COURSE DATES

17-19 April 2017

11-13 December 2017

Gain a competitive edge in the preparation and documentation of oil and gas contracts with a **3 day course on International Oil and Gas Contracts**.

Contracts are what makes the oil and gas industry work. If the South-East Asian oil industry is to flourish in a tough global market, it's vital that local companies and lawyers can prepare and implement contracts that enable local oil and gas businesses to compete internationally.

At this **3 day course** delegates will obtain a thorough knowledge of how to prepare oil and gas contracts in the context of different regulatory regimes. They will get an insight into the contract matrix for a typical oil and gas investment and how such contracts relate to one another.

By understanding the key issues in oil and gas contracts, delegates will be able to create value for their organisations and for their own career development.

VENUE

The centre of South East Asia's Oil and Gas industry, Indonesia is a 'go to' favourite for multinationals and regional governments with an impressive track record in holding important and high profile events including the APEC and ASEAN summits. Enjoy an extensive array of attractions ranging from the country's natural beauty to its wide variety of restaurants, hotels and shopping facilities. The training venue will be a hotel located conveniently for transport, business and leisure facilities.

BY ATTENDING THIS COURSE, DELEGATES WILL:

- Learn how to use industry negotiation documents to best advantage
- Understand the key issues to be addressed in standard oil and gas contracts
- Know the legal and practical nuances of so called "boiler plate" provisions
- Identify the best dispute resolution mechanisms for all contracts
- Have an intuitive understanding of the different types of commercial contracts, how they fit together and their commercial drivers
- Recognise the relative positions, roles and obligations of all parties, whether government, national oil company or international oil company
- Have increased confidence and credibility in negotiations, arbitration and dispute resolution

WHO SHOULD ATTEND

Attendees of the International Oil and Gas Contracts course are drawn from Legal Practices, NOCs, IOCs, and professional services firms that serve the petroleum business.

As well as in-house lawyers, and private practice lawyers engaged in oil and gas law, commercial managers, project managers and government officials whose roles involve contracts and negotiations will benefit from this course.

BOOKING

3 easy ways to book:

BG GROUP

COURSE DIRECTOR

About Bryan Gundersen

Acknowledged as one of the world's leading oil and gas lawyers by the International Who's Who of Energy Lawyers and numerous other publications, Bryan brings over 30 years' experience in energy law to this course.

As a course director, Bryan aims to inspire his audience with a combination of

compelling case studies, group discussion and challenging exercises. Amidst all his legal successes, he says, "there is nothing quite like being able to help the next generation master the legal complexities of our industry."

In his professional career Bryan has acted for the New Zealand Government, state owned enterprises and a variety of major American, European, Japanese, Australian and New Zealand companies. He has been involved in contracts and negotiations at almost every stage of a project lifecycle, from exploration to decommissioning.

He is also the author or co-author of over 100 articles, books and papers on the energy sector and oil and gas legislation, and a regular speaker and chair at industry events. He is a former chairman of LawAsia Energy and the Energy Law Association of New Zealand.

What are the trends within the oil and gas sector that make this course so relevant?

- The increasing need to build local capacity as large IOCs divest from Asia and indigenous firms acquire upstream assets
- Interest from foreign investors and international law firms in Asia's energy market
- The changing relationship between international oil companies (IOCs), national oil companies (NOCs) and service companies
- Price volatility and its impact on contracts
- New technologies and new sources of energy
- Environmental and geopolitical concerns, especially around health and safety

TESTIMONIALS

From participants in our Contracts & Negotiations courses

"The training was great, very helpful in appreciating the issues with PPAs"

"The course material is very informative and borne out by deep research and experience ..."

"The course content has been very deep and good value for money."

"He [the trainer] is clearly experienced...his responses to questions were ...inspired"

Project Governance
Leadership in Oil & Gas

ABOUT US

- Helping talented individuals build their careers is an inspiring experience. At Warren Business Consulting our focus is on developing tomorrow's E&P managers and leaders.
- We believe that a successful career in upstream oil and gas depends on a thorough understanding of the industry's complexities. Technical expertise is not enough: to become a manager or a leader means understanding the geopolitics, the technology, the finance, the many different stakeholders – as well as knowing how to get the best out of a team.
- The firm was set up in 2006 by Angus Warren, an industry veteran whose career includes 15 years at BP. Since then, hundreds of aspiring managers have been on our courses, in various locations around the world, as part of their career development.
- As well as the public MBA in Oil and Gas courses shown above, we run courses on Contracts and Negotiations, Risk Management, Project Governance and many others; we also deliver in-house courses customised to meet the clients' specific requirements, at a location convenient to them. Our portfolio of products is expanding rapidly so please check the website for latest developments.
