Course Summaries

All our courses focus on strategic management issues in the energy business, from upstream oil & gas to renewables, helping executives make better decisions and develop their careers.

MBA in Oil & Gas

Highly acclaimed introduction to the fundamentals of the upstream oil & gas industry, giving you a CEO's perspective on the business and a clear understanding of what drives profits.

Digital Transformation in Energy

A new 3 day programme to help executives navigate the complexities of AI, Big Data, IoT and other new technologies to transform their business.

International Oil & Gas Contracts

Providing a thorough knowledge of contracts in the different markets of the global oil industry, this is a course designed for in-house lawyers and their legal advisors, commercial managers, government officials and other executives involved in complex contractual negotiations.

Project Management

Focused on Project Governance, rather than day-to-day management, this course will help managers identify and select the right projects, design them appropriately and supervise their successful delivery.

Contracts & Negotiations

A well-established course covering the range of commercial contracts in the oil and gas industry and how to negotiate them. Relevant for anyone involved in JVs, granting instruments, GSAs, PSCs, or any other partnerships.

Leadership

This two day introduction to Leadership in Oil & Gas looks at the key principles of managing high performing teams in the complex world of exploration & production, for those taking on new functional regional, or staff responsibilities.

Risk Management

Risk is everywhere in the upstream business. This course will help managers identify and mitigate risks - subsurface, country, commercial - throughout the appraisal process.

In-house Courses

We also deliver a range of in-house courses customised to the client's needs. Please contact us for further information.
